## ALLOWANCE

### *Information Disclosure Statement*

1. The information disclosure statement filed 16 March 2004 fails to comply with 37 CFR 1.98(a)(2), **which requires a legible copy of each cited foreign patent document**; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. Only the references for which copies have been provided have been considered by the examiner.

### *Specification*

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that **the abstract not exceed 150 words in length** since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The abstract of the disclosure is objected to because it exceeds 150 words in length. Correction is required. See MPEP § 608.01(b).

***Allowable Subject Matter***

4. Claims 1-11 are allowed.

5. The following is an examiner's statement of reasons for allowance:

The instant application is deemed to be directed to a nonobvious improvement over the invention patented in U.S. Patent No. 6,800,425 to Naitou et al. The improvement comprises a step of coating the region corresponding to the core pattern and a surface of the cladding layer with a polemic acid that forms a polyimide resin having a higher refraction index than the polyimide resin having a higher refraction index than the polyimide resin of the cladding layer, and imidizing the polemic acid by heating to form a core layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent Application Publication No. 2004/0013953 to Mune et al.

U.S. Patent No. 6,389,215 to Lindsay et al.

U.S. Patent No. 5,649,045 to Fjare et al.

U.S. Patent No. 5,449,742 to Beuhler et al.

U.S. Patent No. 5,317,082 to Beuhler et al.

Each of these references discloses a polyimide optical waveguide and a method of making a polyimide optical waveguide similar to the claimed invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin S. Wood whose telephone number is (571) 272-2364. The examiner can normally be reached on Monday-Thursday (7am - 5:30 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rodney B. Bovernick can be reached on (571) 272-2344. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
